COUNTY OR LOCAL ROAD MILEAGE REPORT

FOR THE CALENDAR YEAR 1952

PREFACE

Three counties were completely reinventoried during the season of 1952 which increases the total number of counties to twenty-four that have been remapped and field checked since this project began in 1946. Changes in these counties principally in road type classification are reflected in the revision column on the county system.

It will be noted that tables UM-1 and UM-1A have been prepared in accordance with the instructions received in Mr. Fairbank's memorandum to District Engineers dated May 21, 1951. These two tables classify city street mileage by population groups, system, and surface type.
